#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## **DETAILED ACTION**

### ***Information Disclosure Statement***

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

### ***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 202,401,403,504,503,508. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective

action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

The disclosure is objected to because of the following informalities: on page 8, line 15, it is unclear what applicant is meant by "electro-mechanical devices".

Appropriate correction is required.

### ***Claim Objections***

Claims 1-2,7,9, and 11-12 are objected to because of the following informalities: the title of the invention should be removed from the claim limitation in claim 1, in claim 2, on line 3, "(back and forward)" should be changed since parentheses are reserved for structural element numbers, in claim 7, line 2, the phrase "able actuator" doesn't appear to be clear, in claim 7, line 4, "wich" appears to be a misspelling, claim 7 should be written as one complete phrase with only one period, and in claim 9, line 1, the phrase "able support" doesn't appear to be clear. For claims 11-12, please see the first comment regarding words or phrases in parentheses. Appropriate correction is required.

Claims 14-17 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 14-17 have not been further treated on the merits.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-4 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 2 recites the limitations "the two stop limits", "the back support", and "the reading position" in lines 2-4. There is insufficient antecedent basis for these limitations in the claim. Claim 3 recites the limitation "the bottom" in line 2. There is insufficient antecedent basis for this limitation in the claim. Claim 18 recites the limitations "The mechanisms, the electrical or electronic controls" and "the electrical hardness", "the seat assembly", "the various positions", "the take-off position", "the resting position", "the upright reclaimable position" in line 2. There is insufficient antecedent basis for these limitations in the claim.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Taylor (#2,500,742).

Taylor shows a seating apparatus comprising a main seat frame (11), a back seat (15), a sub back seat (24), a seat pan, a footrest (16), and mechanisms and controls (37,40-42).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Matsumiya, Hanson et al, Garas, Weant et al, and Smith are cited as showing similar types of seating apparatus.
